

kavaiyatech.com, rebuilt to **win and handle enquiries.**

Audit findings, a ready-to-launch new website, a 90-day plan
and simple monthly care for Kavaiya Technologies India
Private Limited (KT INDIA).

A careful site, built for reading, not yet for enquiries.

The current site has correct titles, structured data, a privacy page, honest R&D notes and fast desktop loading. A passive review on 3 October 2026 found **33 improvement points** (no critical issues). The biggest opportunity is to turn a one-page research brochure into a site that is found, trusted and contacted.

Top five findings

#	FINDING	WHY IT MATTERS
1	The whole company is on one page. Search engines see 2 URLs, so no service can rank on its own.	Buyers search for the service, not the company name.
2	No enquiry form. "Request service" buttons scroll to an email link.	Every extra step loses enquiries, and none are tracked.
3	No published proof. No case studies or testimonials, yet the page states "05 major clients".	Buyers look for evidence before getting in touch.
4	Slow on phones. Mobile 69/100, total blocking time 1.4 s (desktop 100).	Most first visits are on a phone.
5	Hard to find and to measure. No analytics, unverified Google profile, no listings, no DMARC.	You cannot improve what you cannot see; email can be spoofed.

What I will deliver

- **The new website, already built:** 18 pages, one page per service, enquiry form, proof sections, redirects for every old link.
- **Week-one fixes:** security headers, caching, DMARC, Search Console, analytics.
- **Monthly care:** updates, backups, monitoring, content edits, SEO and a monthly report.
- **You own everything:** domain, code, analytics and content stay in your name.

Goals, not guarantees: enquiry possible in under a minute from any page; every service indexable; security headers grade A and DMARC live within 30 days; 2–3 approved case studies within 60 days.

What the audit found, with evidence.

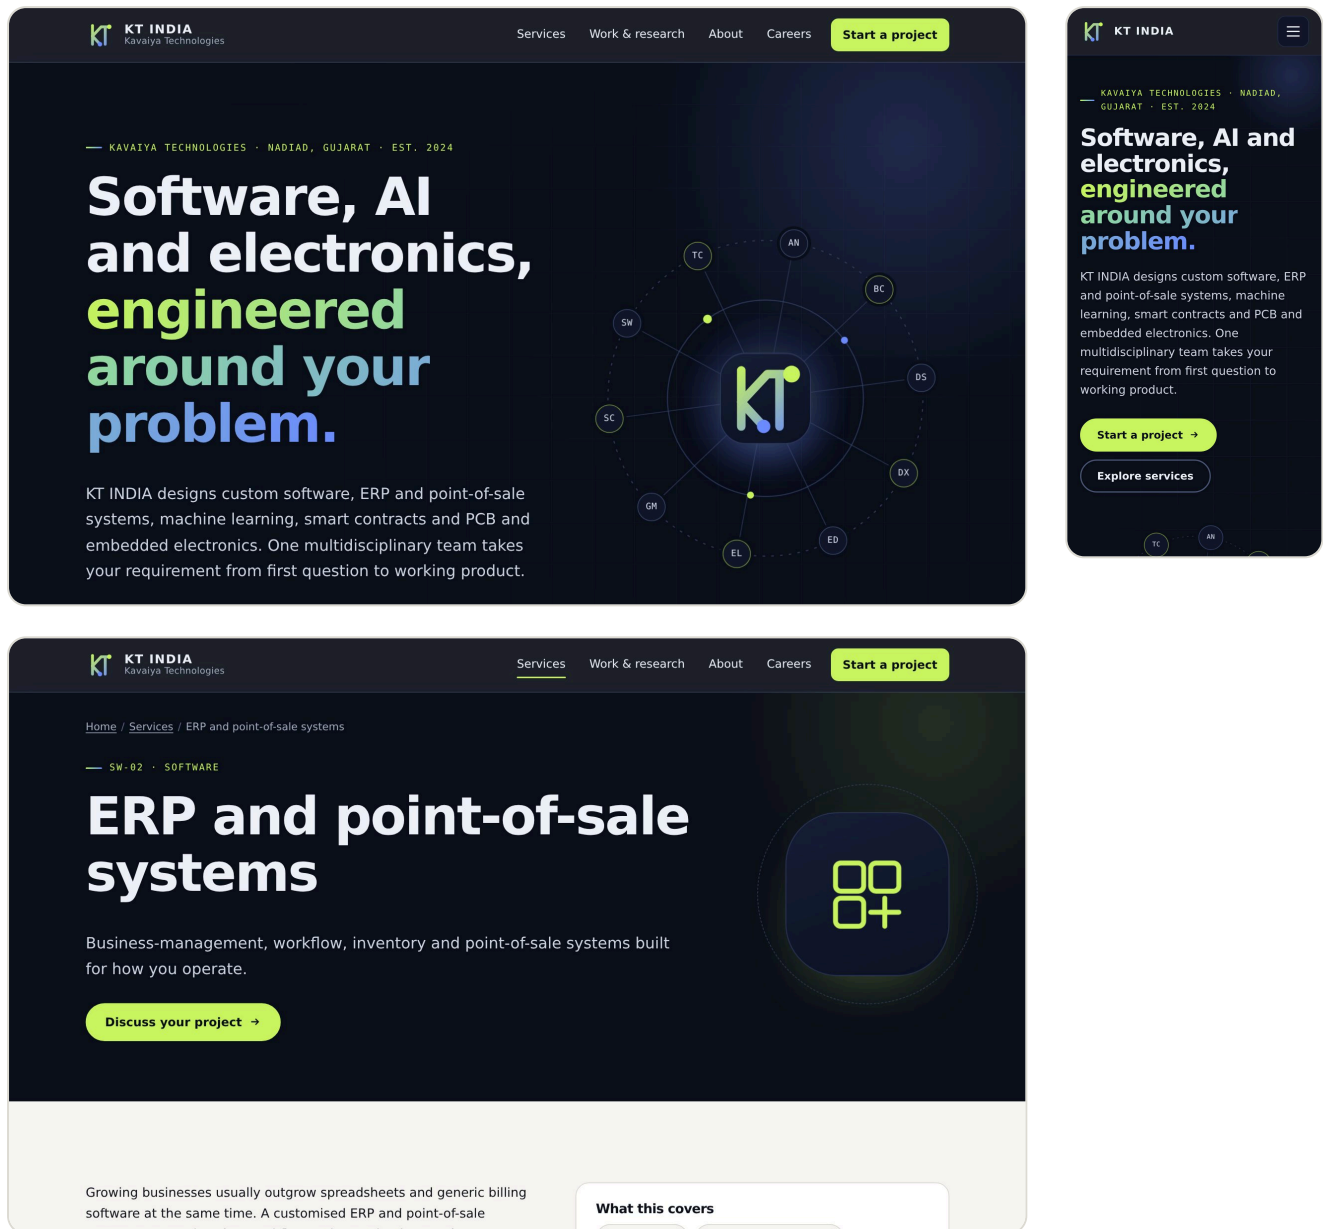

Passive checks only: public pages, response headers, public DNS and Lighthouse 13.5 on a mirror of the live files (the live site blocked headless testing). The full list of 33 findings with evidence is in the audit report.

ID	FINDING	EVIDENCE	SEVERITY	EFFORT
F30	One-page site; ~39,000 px tall on mobile	sitemap.xml lists 2 URLs	● High	L
F31	No page per service for buyers' searches	Single title/description theme	● High	M
F21	No enquiry form; buttons only scroll	script.js · requestService()	● High	M
F22	No proof; "05 major clients" unsupported	Full page text	● High	M
F18	Mobile performance 69; TBT 1,370 ms	Lighthouse, 20 long tasks	● High	M
F32	Peers show 165-847 pages, case studies, reviews	Competitor sitemaps	● High	L
F33	Ten sectors may dilute the buyer message	Page structure	● High	L
F01	No security headers (HSTS, CSP, ...)	HTTP response headers	● Medium	S
F02	No browser caching on any asset	No Cache-Control header	● Medium	S
F10	No DMARC; DKIM unconfirmed	Public DNS	● Medium	S
F15	No analytics or tag manager	Page source	● Medium	S
F20	Privacy notice lacks DPDP Act 2023 items	policies.html	● Medium	M
F25	Google Business Profile not verified; no LocalBusiness data	Search; JSON-LD	● Medium	M
F26	No directory listings or reviews found	Search across 8 platforms	● Medium	M

Already good, and kept

Canonical URL and Open Graph tags · organisation and service structured data · honest R&D disclaimers · published company identifiers · skip link and reduced-motion support · light page weight · gzip compression · SPF record.

Built, tested and ready to preview.

Inside

- Home, Services, 8 service pages, Work & research, About, Careers, Contact, Privacy, Terms, 404
- Enquiry form with spam protection; service pre-selected from each page
- Case-study, testimonial and team sections ready for your approved content
- 301 redirects for every old link, including the white-paper URL

The logo shown is a concept refresh; your current logo can be kept. Placeholders (yellow) mark content only you can supply.

Tested

- Lighthouse 97-100 on performance, accessibility, best practices and SEO (mobile and desktop)
- 0 broken links; 0 HTML validation errors; 10 of 10 redirect tests passed
- Works by touch, mouse and keyboard; motion turns off for visitors who prefer it
- No third-party scripts or cookies; strict security headers

Fix and launch, get found, then grow.

DAYS 1–30

Fix, launch, measure

- Security headers and caching
- DMARC, DKIM check, CAA
- Search Console, Bing, analytics with enquiry goals
- Check the firewall rule that blocks testing tools
- Collect case studies, testimonials, team
- Launch the new site; submit the sitemap
- First monthly report

Goal: enquiry form live; 16 pages indexable; mobile 95+.

DAYS 31–60

Get found

- Complete the Google Business Profile
- 5 consistent directory listings
- Publish 2 approved case studies
- Align LinkedIn and Instagram profiles
- Move DMARC to quarantine
- Fix Search Console issues

Goal: same name, address and phone everywhere; proof on every service page.

DAYS 61–90

Grow

- One practical article per month tied to a service
- Third case study; ask for Google reviews
- Adjust copy based on analytics
- 1-hour positioning session: buyers vs. research partners
- Quarterly speed, accessibility and security re-test

Goal: decisions based on data; growing search entry points.

Monthly report includes

Visits · enquiries (form, WhatsApp, email clicks) · top pages · search queries and positions · uptime · issues fixed · next month's plan.

One launch price, one simple monthly plan.

Launch project

Content edits, form, deployment, redirects, DNS email security, analytics, handover

[₹]

Essential

[₹] /month

- Monthly checks; quarterly security review
- Uptime alerts (5-min)
- Monthly backups
- Up to [1] h content edits
- Quarterly SEO and speed check
- Short monthly email report
- Urgent: within [8] working hours

Growth

[₹] /month
